

OPEN CALL FOR ADVANCED RESEARCH PROJECTS

The CORBEL partners launch an **Open Call for Advanced Research Projects** and offer all academic and industrial scientists in Europe the unique chance to accelerate their research.

Supported by the Open Call project managers, successful applicants will be offered **open access to cutting-edge technologies and services** available at **more than 20 service providers from 10 European research infrastructures**.

Successful project proposals request access to at least two different research infrastructures. CORBEL funds will be used for funding the service providers to perform the services requested by the successful applicants. Travel and accommodation costs will be covered.

For more information about the Open Call and the application process visit our website.
