

Stellenanzeige

Abberior is one of the world's leading suppliers of high-resolution light microscopes. Abberior offers the first commercial light microscope with molecular size 3D resolution – the Abberior MINFLUX. Our customers are research institutes and universities with excellent reputations in biological and medical research. We are - even in times of COVID19 - a stable, growing company with currently more than 70 employees at two production and development sites in Germany and subsidiaries in Switzerland and the USA.

As a growing business we are looking for a

Scientific Content Creator (m/f/d) for our office in Göttingen

Your responsibilities:

- ✓ You create and deliver captivating content as part of our marketing team
- ✓ You are responsible for website copy, social media posts, product descriptions, marketing collaterals, and everything that attracts and grows the interest of scientists in our field
- ✓ You collaborate with our application scientists and engineers to identify and develop relevant ideas. You're constantly on the lookout for content that perfectly transports our message
- ✓ You connect with external partners, customers, and agencies

Your profile:

- ✓ You have a scientific background in biology or other life sciences
- ✓ You have a proven track record as a creative and passionate science communicator
- ✓ You are a highly motivated team player who takes initiative
- ✓ You have excellent command of German and English (both written and spoken)
- ✓ Experience with light microscopy would be a plus

What we offer:

- ✓ A dynamic and motivating environment close to top international research and a friendly, committed and creative team with a great passion for innovative ideas
- ✓ A familiar company atmosphere and short decision-making processes
- ✓ A performance-related salary
- ✓ Flexible working hours with consideration of core working hours
- ✓ The ability to grow with our company through continuous training and career advancement opportunities
- ✓ Company events, coffee and drinks and fresh fruit

We are looking forward to your application, also stating your earliest possible starting date and salary expectations to career@abberior-instruments.com. Your contact is Dr. Matthias Reuss.
